

Snell Easy Open Hole Under Bluebird Nest Box

Nest Box - without roof

Put 2*6 in on an angle and stand sides with angle next to 2*6. Attach.

Roof:

- fascia is screwed to the roof and hinged at front on bottom of fascia.
- a nail in a slanted down hole through the fascia and side on both sides to secure the roof.
- make a jig to get both sides the same (ie. hinge holes).
- a drip edge is nailed over end of 2*6 to allow roof edge clearance from mounting structure and provides 1/4 inch vent space.
